

Children and Families First Commission - First Five Trinity

The Trinity County Children and Families First Commission provides funds for projects that enhance the development of children prenatal through 5 years old. The First Five program ensures that families from all California's culturally, linguistically and geographically diverse populations, including those with special needs, can connect to a system of services that is easy to access, use and understand, and that meets their individual needs to support their children's healthy development and school readiness.
